
Lower Strut Mounting Hardware, 2005+ (MMF-3)

This kit includes:

- 2 Strut Ear Mounting Bolt
- 2 Strut Ear Mounting Nut

OEM Ford nuts & bolts for attaching the strut to the spindle on 2005+ Mustangs. Ford lists this hardware as one-time-use only. These MM kits include the latest generation design at a less expensive price. Out as a production line change in 2009, this hardware has a fine thread pitch instead of the previously used coarse thread pitch. This mandates a greater tightening torque, to provide an improved attachment of the strut to the spindle.

Read all instructions before beginning work. Following instructions in the proper sequence will ensure the best and easiest installation.

Instructions

1. Install the replacement hardware and torque to 166 lb-ft.
